

A Recommendation System for Biological Control Agents in Agriculture

by Daniel Carvalho, Prof. Márcia Barros

Why?

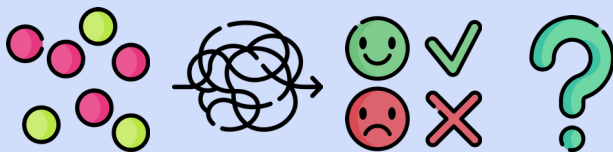

Fragmented BCA information

Difficult product selection

Existing tools lack recommendations

What?

Unified BCA database

Recommendation engine

PlantPathoRec integration

Recommendations for farmers & researchers

A Recommendation System for Biological Control Agents in Agriculture

by Daniel Carvalho, Prof. Márcia Barros

How?

Collect & unify data

Clean & validate

Train recommendation model

Validate & integrate

Retrain with new data

Web scraping/dataset gathering

Data cleaning and validation

Model development and evaluation

Integration and validation

On new data
